SUDIPTA GHORAMI

Full Stack Developer

📞 +91 8293863268   @ ghoramisudipta32@gmail.com   🔗 LinkedIn

SUMMARY

I am a full stack developer transitioning to a Software Development Engineer role, bringing a wealth of experience in RESTful services and API design. My expertise includes building responsive web applications and integrating robust backend systems with a strong emphasis on database programming using MongoDB and SQL. I am dedicated to enhancing performance and user experience in all my projects

EXPERIENCE

Web Developer Intern

Secwebxperts privet limited

📅 09/2024 - 03/2025

🔗 https://secwebxperts.com/

Web Developer Intern

- Developed responsive web applications using React and UI libraries, collaborating with cross-functional teams to integrate RESTful services and refine UI/UX designs for enhanced functionality
- Implemented interactive components and integrated APIs, leveraging best coding practices to improve performance and ensure robust application functionality
- Acquired hands-on expertise in web development, object-oriented programming, and teamwork, contributing to the enhancement of user experiences

Full Stack Developer

jobgenix

📅 07/2025 - 11/2025

🔗 https://www.jobgenix.co.in/

Full Stack Developer

- Maintain and update the entire JobGenix website, including job listings, user dashboards, and admin panels
- Implement new features to improve user experience and platform performance
- Debug and fix full-stack issues in production environments
- Collaborate with the founding team to align development with business goals
- Optimize performance, security, and scalability of the website

Hacker in Residence

Heva AI

📅 09/2025 - Present

🔗 https://www.heva.ai/

Hacker in Residence

- Owned the end-to-end development of an AI product, handling problem research, system design, model selection, backend/frontend development, and production deployment
- Conducted independent technical research to evaluate AI approaches, tools, and architectures, translating research insights directly into production-ready implementations
- Built, iterated, and scaled core product features, taking responsibility for performance, reliability, security, and cost optimization in a startup environment

SKILLS

React js   Express js   Next Js

MongoDB   SQL   Redux   Node.js

JavaScript   Python   FastAPI

LLM Applications

Async API Development

Model Serving

Self-Hosting / Deployment   Git

GitHub   NLP   PostgreSQL   DNS
